

THE CHRISTED BUDDHA

(November 1991)

In response to your question of the term 'The Christed Buddha' we can say that, as the Buddha and the Christ incarnated into Spirit, they attained another level of expression of One-ness and in so doing, exchanged the beauty of their Consciousness. There was a marriage of ideals on the spiritual plane. The Christed Buddha is a most Holy expression. In spirit, there was a great burst of growth on both parts as those souls passed into spirit at the time of their transitions. Due to the nature of their souls, due to the vastness that they were able to grasp at the time of their transition, they literally encompassed the At-one-ment of God. And at this time, the beauty of their presence merged, to become a more evolved level of consciousness that is an aspect of the Total. That is to say, they became a Christed One. They are anointed in One-ness. They are of the highest light possible.

What happened is that their vibrations were raised to the highest light, as you are attempting to do, to raise your vibrations to the highest light, so that you will know All That Is God. God flows through you and all are One. But we say to you, there is so much more to understand than One-ness. There is More. There is what we call eternity beyond One-ness. And this is what Buddha and Christ have seen at the time of their transition. They have seen past just One-ness. They have seen All.

These are very esoteric terms, for we cannot describe what we see to you and we realize that this may be in conflict with some of your teachings. All is God, but the expansion of consciousness CONTINUES. Buddha and Christ are continuing to grow past this level into what we call the Kingdom of Grace. They are growing, and will continue to grow. In our dimension, there are levels of growth just as there are for you. The Christed Buddha is an exchange of beauty and holiness and a FLOWING into the greater consciousness. It is a great honor to be in the presence of such a level of consciousness. However the beauty and knowledge of God is within at all times.

It is misunderstood on the human plane that the past ends... it is limitless. And this is what we are trying to say to you, growth is limitless... as is God. It is infinity, it is beyond probability, it is beyond human conceptualizations. The Christed Buddha is anointed in beauty, in holiness and in the upper levels of limitlessness. Anointing has to do with the view of the universe in its reality... of its vastness and of its potential for growth. The universe expands and grows, as does consciousness. What we are speaking to you about... is immense. For One-ness is only an aspect of All. And we will say this, that there is more than All, but we do not have a word to show you that. There is One-ness, there is All, and All is God. And all-seeing, all-knowing, is part of all levels of consciousness, but you are always achieving, growing and fulfilling a greater level of consciousness.

At their ascension and transition, the Christ and the Buddha fulfilled themselves more fully... that is to say they flowed in such a vastness that they became true Brothers In Spirit. Mastership proceeds through the dimensions. They are now Masters In Brotherhood, but they are beyond Mastership in your definition... they are One with one-another, and they are One with God. But they are also growing beyond One-ness, to All. And there is more.

So, the Christed Buddha is an interchange of the expression of beauty and love between two developed Masters. This occurred in spirit. They were part of the At-one-ment, but they have expanded their At-one-ment and they have grown to see the All. And now, they come to serve mankind with the All-ness that there is, and at the same time to see for themselves, through spiritual eyes (as we always are doing), beyond the All-ness. God is beyond our description. When we say that God is light, love, peace, and truth... these things are true, but God is beyond that. God is beyond conceptualization. God IS and God always has been. And so we are always growing into the vastness that is God.

That does not mean that we are at unrest, that we are in agitation, or that we are in unhappiness. It *sounds* as though we are saying that in spirit, we are in the *pursuit* of All-ness or One-ness. That is not the case. We are at Peace. We are in Beauty. We are in Wisdom. And in that wisdom, we see that our growth toward the All and beyond is self-evident. We do not grasp and we do not pursue. We *evolve*. We evolve through the expression of beauty and peace in our lives. We evolve to some extent, through our duties to serve you, for we are growing at this time. We evolve... through continual attunement. We spend much of our time providing for our continuity with other galaxies and with the earth plane, but at the same time, we are working on the level of upliftment that you seek. We are working on the expression, and growing into the expression, of the beauty which is beyond the All.
