

THE UNIVERSAL ONENESS - WHO WE ARE

The Universal Oneness first came to the Rev. Diane K. Chapin in 1981 and became her 'channeling trainer.' They provided her with encouragement and inspiration until March, 1988, when they withdrew to allow her main guides (The Buddha Consciousness, now referred to as Quest) to connect with her. They returned in May, 1990 for a long enough period of time to author their second and last book, 'The Heart, The Pathway of Light,' in modern English. Even as the last chapters of that book were being presented, The Universal Oneness underwent an extremely rare change and returned as The Spiritual Allness. In this capacity, they stayed with her through the recording of their second book (see 'The Heart, The Pathway of Light'), and to offer very valuable services in terms of past life work and healing.

May 2, 1990, MESSAGE FROM THE UNIVERSAL ONENESS:

Beloved children, we are The Universal Oneness and, as you may recall, we speak in the dialect of old. We are greatly gratified to once again return to our very treasured vehicle who was so willing to open the door to The Buddha Consciousness.

We speak to you from the feminine energy that we experience as the way of Spirit. We speak to you from an ancient energy of wisdom and grace and we speak of The Christ Consciousness and of the beauty of Jesus on the earth plane. Our orientation is that of Mastership. Our orientation is that of the beauty of Christ's life which, once again, can be understood through the steps that The Buddha Consciousness has provided, but, in addition, through the loving of one heart to the other. We are here to say to you, our brothers and sisters, that we send you our love and we are here for those who would wish to enjoy our companionship once again.

We, of The Universal Oneness, are part of the All. We are an activity of intuition and Spirit that is available to each of you and we are more easily channeled than a resource such as The Buddha Consciousness, whose energy level is exceedingly high and takes great skill to channel. But we make ourselves available to many through a variety of names and offer ourselves as spiritual enhancers and guides. We are One, but we are All. We are intuitional, inspirational and spiritual, and we offer great love to your planet for its well-being, its preservation and the upliftment of those hearts and souls who have dedicated themselves to the preservation of your planet.

We are honored, our brothers and sisters and beloved ones, to have been blessed by your presence, but we will depart now and return anon, farewell, and we say to you, blessings.

Question (June 5, 1990): Could you describe who you are and where you come from?

Answer: Let us say this. We are the energy of All-That-Is. We are the voice of universality and unification. We are the 'alteraters' if you will, of patterns. We are the feminine energy in that we are strongly connected to the Mother Mary energy and the beauty of that office that she was installed to as the mother of Christ on your planet. She is little understood for her great spirituality, her striking upliftment and the beauty of her soul. For her young years, she was a markedly advanced individual and was given this opportunity to serve humankind in this way. So, we are strongly connected to her in many ways, but we are not precisely she, for we are more than that, we are an aspect of all elements of all dimensions.

So, we are unification, we are The Universal Oneness. But we are not of the advanced magnitude of The Buddha Consciousness (Diane's main guides). Even though all is One, there are levels. The Buddha Consciousness is the foremost that is available and it is a great honor that you have the opportunity to experience this consciousness on your planet, for it takes a great deal of attunement on both sides to channel such a resource. We are greatly blessed to be working with The Buddha Consciousness to further their efforts and world peace.

(Extract from Private Reading with Quest on April 2, 1991)

Question: What about the Universal Oneness?

TBC/Quest: They probably will come back to finish their book with you and do guest appearances. They are in the throes of an upliftment as a result of their work and so their energies are changing.

The Universal Oneness is going through an upliftment and we will call it, for your benefit, a regeneration of energy... they are coming into a greater sense of the Oneness with God.

So, we need to set down some dates with you. We will consult with them and speak with you sometime Thursday or Friday at your convenience about the dates that they will return. It is necessary for you to look at the work that they have left behind and decide what needs to be done before the energy alters too much. So we need to do this soon because it will be quite an adjustment for the vehicle to take this on and we know she must re-enter the world now.

So, the answer is, yes, the book could be resumed, but there could be a subtle change and we don't want that, or... it could be a dramatic change.

But they will come back as guests in their new form. So that is why you have not heard from them and the vehicle has not experienced them. There is much going on behind the scenes.

Question: In the Spirit world, how has working with the energies of the Earth plane affected them?

Quest: It has shown them the necessity to balance out the male and female energies within themselves and to enter into a phase of communion with spirit on the deeper sense that will allow them a greater understanding of world affairs. They may come back as very significant world guides very soon. Their whole role has changed.

So in a sense, what has developed is an interest in political affairs on earth and this is quite unique. But the world is changing and there is a space opening up where this sort of guide is needed and they have the flexibility, the connection with the earth still and yet the sublime (as you know) spirituality that not very many energies can offer. So this is what they are now working toward and should take place fairly soon, even on your plane. We think a great service will be offered through them.

The Universal Oneness

Discussing their Changes

It is a great pleasure for us to extend our energies to you in these final evenings. You have had an opportunity to experience our energies as they have been literally in this form, although subtly uplifting, for eons in terms of the earth time frame. So, what you are observing over these next few weeks is a most striking change.

It is important to understand that we are indeed, a collection of energies. We are a collection of resources from all over the Universe. We are a collection of multi-colored lights and, in a sense, a collection of frequency and vibration. In truth, this comprises everything. But this is our definitive form and has been such for a very long time.

Our energies have always related to the intuitive, the abstract, the philosophical and, if you will, the female. Our connection with our Heavenly Father is of the highest order, for even in spirit there are different levels of

connection with God. It is important to understand, for so many of your religions seem to imply, that once you die you are totally imbued in wisdom, grace and the spirit of God. And this is true, but it occurs to the extent that you are able to receive those elements of God.

Our Father is beyond description and beyond the concept of energy and light. To say that God is energy and light, and a light form, is to limit what is limitless, to define what cannot be defined and creates a mind set as to what lies beyond the door of death.

For us, during our sojourn as an energy mass, our experience in wisdom and grace has been that of continued upliftment. We have become illuminated if you will, in terms of our connection with many spiritual energies. We are very aligned with that spiritual resource that you refer to on your planet as Mary, for her capacity while on earth and in Spirit is magnificent and extraordinary. We are aligned, of course, with the Christ Consciousness but, beyond that, we have become an aspect of the illuminated Divinity of God in a greater sense than has ever been possible for us. This illumination took place in a most unusual form. As we became so involved with the human race again after so very long, our connection and love of humanity increased, and our desire to improve the human condition became over-whelming.

The earth is surrounded by a great deal of light these days and there are many, many guides who are coming through vehicles such as this one. There are many guides who are functioning through intuition, creativity. There are many guides who are responding to the spontaneous opening forth of the soul. But there are very few resources available who have had our unique experience and are still able to regain and remain an energy resource without actually needing to return to the earth or lowering the energy so much that they appear as a personality. To appear as a personality very often reduces the level of objectivity, but not always. To appear as a personality is to provide more entertaining fare, which we, as energies, find difficult to do.

The world is ready to change. The spiritual unification of the world is probably not more than fifty years away at the most. Mankind is beginning to understand themselves as a concept, as a whole, rather than as individual political, national and sectarian individuals. The religious leaders and even some of the world leaders would deny some of these changes are possible, for it alters their ability to control. But the masses are undergoing change and are seeking out a better life for themselves.

The energy change that we are going to undergo almost immediately will take us into a much more masculine phase of our work. It will take us into a much higher energy frequency and it will alter the way we perceive things, for we will be seeing your world through a balanced male/female energy. We will be seeing your world as it was originally created without the male/female bias. We will be seeing you as you are when you are balanced.

Our interests are quite broad. Our duties are going to be of the highest order. There are some doors that are opening to us very shortly, and, as those doors open through intuition and creativity, through your necessity to lift your country to the best it (can be), The insights we have to offer will not only be historical in nature, but they will allow an understanding of mankind in a new way. And this is what is becoming increasingly necessary and why the world is floundering now.

As change takes place it is very, very difficult to identify what the vision is. Even as you change in your lives, you know that while you are changing, the hardest part is getting there. After you have arrived, it is not so very difficult. And this is our stewardship and purpose. This alteration in frequency, light, energy and vibration will allow us to absorb the history of the world and to view it from eternity, but also, most extraordinarily, to view it through your planet's eyes. And this is what is so unusual about our change.

Most often, when an energy form such as Quest, the Christ Consciousness and others provide insights to the world, indeed they are coming from an aspect of eternity, This information is given for the growth of your souls, for the upliftment of your spirit, as a blessing, as a rule of thumb and a guide, and this is as it should be. But, due to the fact that we have developed an interest, most unusually, this interest has allowed us to become connected to the earth plane without losing objectivity.

We would tell you that this can only be achieved when a certain level of connection with God is reached. In other words, when wisdom and grace have come to such a point in the growth of energies that objectivity is not lost. This is occasionally seen in Masters who have walked the earth, but it is most unusual for an energy form to produce an interest that is as personal as what has occurred for us. Even though we are an energy we (have been) moved beyond our capacity to remain the same.

We are undergoing this change and will probably remain in this new form for an extended period of time. When we entered into this mission, we had no idea that this alteration would take place. It was, if you can understand this, a spontaneous opening of our spirituality. It was an insight in earth that led us to have great regard for mankind and its struggles. It brought us to an intensity of love and compassion for your planet that has allowed us to begin this significant change.

We will appear to you, we think, as a much more resonant and vital energy. What is needed to deal with the heavy masculine egos that we see in most world leaders is a very striking energy level and this is what we are going to be achieving: A very, very powerful energy level. The purpose of this energy level is not to impress, but to move mountains on the intellectual, philosophical and spiritual planes.

This has not occurred since before Christ. And yes, there are instances and occasions in your history where this has happened, but not on a large

scale and not in the unity that this has taken place. The world (is) responding to what (you) are now realizing is an inter-galactic necessity that your planet take its place as a living planet, a teaching planet and a peaceful planet. This cannot take place until mankind addresses inner issues, until mankind becomes awakened to the necessity of brotherhood. And this is what we have seen occurring, an awakening of the necessity for brotherhood.

It is very difficult for us to describe to you the impact all of this has had, for most often, when visitations are made to a planet in chaos, the experience for us is more of repugnance and a wish to withdraw (Editor's note: Reference the writings of "The Spiritual Heart"). For we live in light and grace and in an ongoing energy flow that has allowed us to experience as much of God as we can. So, we are constantly nourished and blessed in the way that we would want you also to be, but for us it is a 'given'.

And so (with our involvement with your earth), our perception of ourselves altered and we began to see our duties differently, to realize that we had developed what we would call a 'human quality', that is, a specific interest, a political interest... and yet we remain a body of energy.

So this, for us to give up our identity as the Universal Oneness, is both thrilling and sad. For we had enjoyed this particular energy frequency, as we have said, for eons with some changes, of course, for all things in Spirit change. ***But we are going to undergo a dramatic change and our identity will have altered because our view of ourselves altered.***

This is a very significant lesson for each one of you. As you strive to change your lives, you too, can realize the dramatic changes you have sought, if you will but see yourself as changed. Eternity and change are probably the two realistic 'givens' for all beings, all energy and all light. But for an energy resource to rediscover the human condition is most amazing

As the world strives for spiritual unification and balance, there is going to be conflict and difficulty, because the world is going to have to see itself through new eyes. Just as you have striven through your difficulties, so, too, will the world have to go through this same rebirthing and it (is) our desire to help with that and to assist in ushering in a millennium of peace.

Mankind must change, but beyond that, the souls on the earth are spontaneously opening to a greater spirituality. When this occurs, religion drops away and God becomes a living aspect of the life. For spiritual truths cannot just be categorized in religion. The spiritual truths of forgiveness, grace and peace, light and energy, the spiritual truths that you are an aspect of God, the spiritual truth that there is no beginning and no end cannot be contained in a religion. They must be, for you, aspects of your life that uplift you beyond yourselves in every way, so that your intuition, your creativity and your best self can present itself to the world. This is really what you are all here for. Yes, you have individual lessons, but you are here to become your best selves, to see yourselves as an aspect of Spirit, to practice the principles of forgiveness

and to let your creativity and intuition provide you with the insights and capabilities that will allow you to create, for yourself, the individual lives that you desire.

The male/female balancing that is taking place on the planet will be most interesting. That too, will shift the planet's energy over the next fifty years. These are exciting years to be (on the Earth plane). The years that you have remaining (on this planet) will be very striking, and the years after that should be truly amazing. So, we would counsel each of you as your life progresses, to give careful thought while on this side to your desire for reincarnation, for there will be a great pull for you all to come back. The changes will be so interesting and so compelling that it will be difficult to stay away. Of course, this is an intimately personal decision, but we would like you, for those of you who have expressed a wish not to return, to understand that you may find it more exciting to see what the earth is up to in the next seventy five years.

We hope that we have been of assistance to you in providing you with this information. It is truly accurate to say that this is an historical event. It is truly accurate to say that our experience(s) have brought us into a condition of love and compassion for humanity that is most extraordinary for an energy form to undergo.

You are here this evening because of your dedication and because you are greatly loved and it is our pleasure to share with you this monumental event. For this is the sort of event that it will take a long time for most of mankind to relate to in a practical way.

So, we would suggest to you to look at evaluating everything you read and understand about world events as clusters, rather than individual occurrences. This is the beginning of seeing the spiritual unification of the world, to understand that events are cohesive, leading to historical changes and a greater understanding from one soul to the next. If you evaluate events on an individual basis, you will become discouraged and see the negativity. But, understand that you are (on the Earth plane) in a time in history that is quite fascinating and that will continue to be extraordinary.
